Profile

My academic studies in architecture left me with understanding that creating spaces in an intentional way could give people a place to practice social behavior. In many cases, the spaces considered important in the world today are virtual, leading me to pursue knowledge and technologies that I could leverage in the exploration of the virtual world. I am passionate about using software as a bridge to create lasting solutions that address how people interact with the world around them.

Skills

- JavaScript
- NodeJS
- HTML5
- CSS
- MongoDB
- Git
- React
- Redux
- Express

- Soft Skills: Skilled problem solver, organized, willing to learn, risk tolerant, adaptable

Projects

- **Survey Blaster:** A platform used to send out large email surveys providing business owners with adequate feedback on customer satisfaction.
Technologies used: JavaScript, MongoDB, API's, HTML, CSS, React, Redux, NodeJS, Express.
- **Q-mmunity:** Search engine use as a tool for developers to find concise information on specific development problems.
Technologies used: JavaScript, MongoDB, API's, HTML, CSS, React, Redux, NodeJS, Express
URL: <https://cs-daily-smarty-ui.herokuapp.com/>
- **Portfolio App:** Multi-page web application with home screen thumbnails that lead to dedicated pages and feature hyperlinks to landing page of thumbnail in question. Tabs include “about me”, “contact me,” and “blog”.
Technologies used: JavaScript, MongoDB, API's, HTML, CSS, React, Redux, NodeJS, Express
